- (b) the Bid shall be signed so as to be legally binding on all members;

- (c) the Bid shall include a copy of the agreement entered into by the joint venture members defining the division of assignments to each member and establishing that all members shall be jointly and severally liable for the execution of the Contract in accordance with the Contract terms; alternatively, a Letter of Intent to execute a joint venture agreement in the event of a successful Bid shall be signed by all members and submitted with the Bid, together with a copy of the proposed agreement;

At the time of Contract award, successful Bidder (including each member of a JV) shall not be subject to disqualification by the Bank due to noncompliance with contractual SEA/SH prevention and response obligations. If any proposed subcontractor does not meet the requirement, the Employer will require the Bidder to propose a replacement subcontractor.

The figures for each of the members of a joint venture shall be added together to determine the Bidder's compliance with the minimum qualifying criteria of (a), (b) and (e); however, for a joint venture to qualify the member in charge must meet at least 40 percent of those minimum criteria for an individual Bidder and other members at least 25% of the criteria. Failure to comply with this requirement will result in rejection of the joint venture's Bid.

Subcontractors' experience and resources **will not be taken** into account in determining the Bidder's compliance with the qualifying criteria, unless otherwise stated in the Qualification Requirements above.

### **Declaration: Environmental and Social (ES) past performance**

The Bidder (if joint venture, each member of a joint venture) shall declare, using the form in Section IV, any contract that has been suspended or terminated and/or performance security called by an employer, in the past five years, for reasons of breach of environmental or social (including Sexual Exploitation and Abuse) contractual obligations. The Employer may use this information to seek further information or clarifications in carrying out its due diligence.

## **2. Technical Evaluation (ITB 30.9)**

Assessment of adequacy of Technical Part with the requirements

.....

*[Insert minimum technical requirements, if any, (or refer to appropriate technical requirements parts) that have to be met by the technical part prior to being considered for technical evaluation by applying the scored technical factors/subfactors in accordance with BDS ITB 30.9.]*

The Rated Criteria (including technical and non-price factors, and sub factors if any), to be evaluated and the scores to be given to each factor and sub factor are specified in the BDS ITB 30.9.

*[The weighting for Rated Criteria (including technical and non-price factors) to be applied, shall be determined based on the following ranges according to the contract placement within the risk and cost matrix included in the PPSD as approved by the Bank:*

- a. High/Substantial Procurement Risk and High Value between 50% to 80%*
- b. High/Substantial Procurement Risk and Low Value between 60% to 100%*
- c. Moderate/Low Procurement Risk and High Value between 10% to 40%*
- d. Moderate/Low Procurement Risk and Low Value between 20% to 30%]*

### Technical Part Scoring Methodology

For an indicative list of sites to be served, see Annex 1. This list may be extended and modified at the time of call-off contracts. At that time, a minimum level of bandwidth to be supplied per site will be added to the tender, along with the expected length of the contract (typically 3-5 years). The scope for provision of fixed Broadband Internet Capacity to last mile Sites is to procure high-speed internet connectivity services for schools and other government institutions.

The bidders should indicate by which technology they plan to serve the sites (e.g., cellular radio, broadband wireless access, satellite, fixed cable etc). The costs of any installation of equipment or works that may be required to provide service should be included in the bid price. The selection among these different options should be technology neutral but will take into account the advantages and disadvantages of each technology, such as reliability, speed, operations and maintenance cost etc.

### b) Density Plans

The delivery packages contain service types according to different scenarios. It shall involve providing capacity to a designated site and distributing it internally within the premises, for instance using WiFi. The cost of capacity and internal distribution should be an aggregated quote as single unit cost per site per year. All recurrent costs over the duration of the contract should be included in the aggregate bid price.

The score for each sub- factor (i) within a factor (j) will be combined with the scores of sub-factors in *the* same factor as a weighted sum to form the Factor Technical Score using the following formula:

$$S_j \equiv \sum_{i=1}^k t_{ji} * w_{ji}$$

where:

$t_{ji}$  = the technical score for sub- factor “i” in factor “j”,

$w_{ji}$  = the weight of sub- factor “i” in factor “j”,

$k$  = the number of scored sub-factors in factor “j”, and

$$\sum_{i=1}^k w_{ji} = 1$$

The Factor Technical Scores will be combined in a weighted sum to form the total Technical Bid Score using the following formula:

$$T \equiv \sum_{j=1}^n S_j * W_j$$

where:

$S_j$  = the Factor Technical Score of factor “j”,

$W_j$  = the weight of factor “j” as specified **in the BDS**,

$n$  = the number of Factors, and

$$\sum_{j=1}^n W_j = 1$$

### Combined Evaluation

The Procuring Agency will evaluate and compare the Bids that have been determined to be substantially responsive.

The Procuring Agency's evaluation of responsive Bids will take into account technical factors, in addition to cost factors.

An Evaluated Bid Score (B) will be calculated for each responsive Bid using the following formula (for comparison in percentages), which permits a comprehensive assessment of the Bid price and the technical merits of each Bid:

$$B \equiv \frac{C_{low}}{C} * X * 100 + \frac{T}{T_{high}} * (1 - X) * 100$$

where

$C$  = Evaluated Bid Price

$C_{low}$  = the lowest of all Evaluated Bid Prices among responsive Bids

$T$  = the total Technical Score awarded to the Bid

$T_{high}$  = the Technical Score achieved by the Bid that was scored best among all responsive Bids

$X$  = weight for the Cost as specified in the BDS

The Bid with the best evaluated Bid Score (B) among responsive Bids shall be the Most Advantageous Bid provided that the Bidder possesses the required qualifications.

- (d) The procuring Agency will distribute the FA based on geographical spread selection

*[The Bidder shall fill in these Forms in accordance with the instructions indicated. The list of line items in column 1 of the Priced **Activity Schedules** shall coincide with the List of Non-Consulting Services specified in the Procuring Agency's Requirements.]*

***As the ITB indicates, each line item will be evaluated on its own and determination for conclusion of Framework Agreement made on the basis of the most advantageous bid for a line item. To avoid fragmentation of services, it is therefore important that the line item should to the extent practically possible be a complete set of services, whose outputs and performance could be described as applicable.***

*If there is a need to specify sub-items, the corresponding sub-item information should be inserted. This is then eventually aggregated to determine the line item prices (bid price) that is evaluated.*

*Two set of Priced Activity Schedule templates are provided based on: (i) range of Call-off quantities and (ii) estimated quantities over the FA period respectively. The Procuring Agency shall use either one of the sets depending on the type of FA and delete the other.*

*If specifying quantities is not applicable to the type of service/s, lump sum may be specified instead of specifying quantities/range of quantities.*

## Provision of fixed Broadband Internet Capacity to last mile Sites

The scope for provision of Broadband Internet Capacity to lastmiles is to procure high-speed internet connectivity services for government institutions using various registered Internet Service providers (ISP) who have point of presence and are able to offer services to these institutions.

Indicative List is attached in ANNEX 1

### A). PERFORMANCE REQUIREMENTS

#### a) Service Delivery

- i. **High-Speed Connectivity:** Deliver reliable high-speed internet to last-mile institutions, with a minimum of two redundant backbone routes at the Aggregation/Sink POP to minimize downtime and ensure continuous service availability.
- ii. **Service Options (CIR):** Provide dedicated bandwidth plans under Committed Information Rate (CIR), with a minimum of 30Mbps scalable to 100Mbps download and 20Mbps scalable to 50Mbps upload.
- iii. **Quality of Service (QoS):** Ensure low latency (maximum 10ms to major Internet points within Kenya), high throughput, and minimal packet loss for optimal performance and user experience.
- iv. **Internal Distribution:** Distribute the provisioned capacity within the premises using wireless access points in accordance with the approved<sup>11</sup> density plan
- v. **Installation Standards:** Comply with ANSI/TIA-568, ISO/IEC 11801, and ICTA standards during all installation works.
- vi. **Monitoring & Support:** Provide managed Network Operations Services including a centralized online portal, 24/7 technical support, proactive monitoring, helpdesk functionality, SLA enforcement, a defined escalation matrix, and service credit mechanisms.
- vii. **Regulatory Compliance:** Ensure compliance with all applicable legal, regulatory, and licensing requirements.
- viii. **Documentation:** Provide complete As-Built documentation, detailed network mapping, and formal infrastructure handover to the ICT Authority

#### b) Density & Leased Connectivity scenarios

- i. **Internet Connectivity** –Managed Internet Service for last mile sites with access points to distribute services internally within the site. Categories of densities are 30 Mbps and 100mbps,

---

<sup>11</sup> The internal distribution is to be done using access points as per each density plan. This approach assumes full internet coverage to the site. The bidder will be required to sketch this topology prior to installation

- ii. **Leased Service –:** Managed Leased Service via 10Gbps interconnection at POP/Sink Site, distributed to last mile sites With access points to distribute services internally within the site. *Categories of densities are 30 Mbps and 100mbps,*
- iii. **Leased Service Point to Point –**Managed L2 Data Links Leased Service for interconnection between POPs across the country on dedicated capacity for any to any POP site delivery approach. *Categories of Point to Point are 200 Mbps, 500mbps, 1Gpbs, 5Gbps, 10Gbps*

**c) Utilization Reporting**

- i. **24/7 Network Operations Center Services :** The bidder shall provide a 24/7 NOC services for continuous monitoring of all last-mile sites, including real-time fault detection, ticket logging, and SLA-based escalation and resolution tracking.
- ii. **Network Management System (NMS):** The bidder shall provide a secure centralized online NMS accessible to ICTA, for real-time monitoring of bandwidth utilization, availability, latency, packet loss, and device health.
- iii. **Bandwidth Utilization Reporting:** The bidder shall generate monthly per-site utilization reports showing allocated capacity, peak usage, average throughput, and 95th percentile traffic. Reports shall be submitted within seven (7) days of the succeeding month, stamped and signed by the host institution, and attached to payment invoices.
- iv. **Performance Monitoring & Optimization:** The bidder shall provide a web-based dashboard with graphical visualization of traffic trends, uptime statistics, SLA compliance, and power status (UPS and battery health). Historical performance and incident data shall be retained for at least five (5) years to support audit, optimization, capacity planning, and future density migration.

**d) Governance & Change Management**

- i. **Service Governance & Change Control:** The bidder shall implement formal Change Management SOPs covering upgrades, density migration (Low, Medium, High), relocations, and configuration changes. All changes shall follow documented approval workflows, defined maintenance windows, and version-controlled configuration management aligned to ICT Authority SOPs to safeguard SLA performance and service continuity.
- ii. **SOP & SLA:** The bidder shall follow the approved SOP linking monthly payment to verified SLA performance per site. Uptime shall be validated using NOC/NMS data, device logs, interface statistics, power logs, and ticketing records.

You may request a debriefing in relation to the results of the evaluation of your Bid. If you decide to request a debriefing your written request must be made within three (3) Business Days of receipt of this Notification of Intention to Conclude a Framework Agreement.

Provide the framework agreement name, reference number, name of the Bidder, contact details; and address the request for debriefing as follows:

If your request for a debriefing is received within the 3 Business Days deadline, we will provide the debriefing within five (5) Business Days of receipt of your request. If we are unable to provide the debriefing within this period, the Standstill Period shall be extended by five (5) Business Days after the date that the debriefing is provided. If this happens, we will notify you and confirm the date that the extended Standstill Period will end.

The debriefing may be in writing, by phone, video conference call or in person. We shall promptly advise you in writing how the debriefing will take place and confirm the date and time.

If the deadline to request a debriefing has expired, you may still request a debriefing. In this case, we will provide the debriefing as soon as practicable, and normally no later than fifteen (15) Business Days from the date of publication of the Conclusion of Framework Agreement Notice.

# Appendix to the Framework Agreement

## Fraud and Corruption

*(Text in this Appendix shall not be modified)*

### 1. Purpose

1.1 The Bank's Anti-Corruption Guidelines and this annex apply with respect to procurement under Bank Investment Project Financing operations.

### 2. Requirements

2.1 The Bank requires that Borrowers (including beneficiaries of Bank financing); bidders (applicants/proposers), consultants, contractors and suppliers; any sub-contractors, sub-consultants, service providers or suppliers; any agents (whether declared or not); and any of their personnel, observe the highest standard of ethics during the procurement process, selection and contract execution of Bank-financed contracts, and refrain from Fraud and Corruption.

2.2 To this end, the Bank:

a. Defines, for the purposes of this provision, the terms set forth below as follows:

- i. "corrupt practice" is the offering, giving, receiving, or soliciting, directly or indirectly, of anything of value to influence improperly the actions of another party;
- ii. "fraudulent practice" is any act or omission, including misrepresentation, that knowingly or recklessly misleads, or attempts to mislead, a party to obtain financial or other benefit or to avoid an obligation;
- iii. "collusive practice" is an arrangement between two or more parties designed to achieve an improper purpose, including to influence improperly the actions of another party;
- iv. "coercive practice" is impairing or harming, or threatening to impair or harm, directly or indirectly, any party or the property of the party to influence improperly the actions of a party;
- v. "obstructive practice" is:
  - (a) deliberately destroying, falsifying, altering, or concealing of evidence material to the investigation or making false statements to investigators in order to materially impede a Bank investigation into allegations of a corrupt, fraudulent, coercive, or collusive practice; and/or threatening, harassing, or intimidating any party to prevent it from disclosing its knowledge of matters relevant to the investigation or from pursuing the investigation; or
  - (b) acts intended to materially impede the exercise of the Bank's inspection and audit rights provided for under paragraph 2.2 e. below.

- b. Rejects a proposal for award if the Bank determines that the firm or individual recommended for award, any of its personnel, or its agents, or its sub-consultants, sub-contractors, service providers, suppliers and/ or their employees, has, directly or indirectly, engaged in corrupt, fraudulent, collusive, coercive, or obstructive practices in competing for the contract in question;
- c. In addition to the legal remedies set out in the relevant Legal Agreement, may take other appropriate actions, including declaring misprocurement, if the Bank determines at any time that representatives of the Borrower or of a recipient of any part of the proceeds of the loan engaged in corrupt, fraudulent, collusive, coercive, or obstructive practices during the procurement process, selection and/or execution of the contract in question, without the Borrower having taken timely and appropriate action satisfactory to the Bank to address such practices when they occur, including by failing to inform the Bank in a timely manner at the time they knew of the practices;
- d. Pursuant to the Bank's Anti- Corruption Guidelines and in accordance with the Bank's prevailing sanctions policies and procedures, may sanction a firm or individual, either indefinitely or for a stated period of time, including by publicly declaring such firm or individual ineligible (i) to be awarded or otherwise benefit from a Bank-financed contract, financially or in any other manner;<sup>14</sup> (ii) to be a nominated<sup>15</sup> sub-contractor, consultant, manufacturer or supplier, or service provider of an otherwise eligible firm being awarded a Bank-financed contract; and (iii) to receive the proceeds of any loan made by the Bank or otherwise to participate further in the preparation or implementation of any Bank-financed project;
- e. Requires that a clause be included in bidding/request for proposals documents and in contracts financed by a Bank loan, requiring (i) bidders (applicants/proposers), consultants, contractors, and suppliers, and their sub-contractors, sub-consultants, service providers, suppliers, agents, personnel, permit the Bank to inspect<sup>16</sup> all accounts, records and other documents relating to the procurement process, selection and/or contract execution, and to have them audited by auditors appointed by the Bank.

---

<sup>14</sup> For the avoidance of doubt, a sanctioned party's ineligibility to be awarded a contract shall include, without limitation, (i) applying for pre-qualification, expressing interest in a consultancy, and bidding, either directly or as a nominated sub-contractor, nominated consultant, nominated manufacturer or supplier, or nominated service provider, in respect of such contract, and (ii) entering into an addendum or amendment introducing a material modification to any existing contract.

<sup>15</sup> A nominated sub-contractor, nominated consultant, nominated manufacturer or supplier, or nominated service provider (different names are used depending on the particular bidding document) is one which has been: (i) included by the bidder in its pre-qualification application or bid because it brings specific and critical experience and know-how that allow the bidder to meet the qualification requirements for the particular bid; or (ii) appointed by the Borrower.

<sup>16</sup> Inspections in this context usually are investigative (i.e., forensic) in nature. They involve fact-finding activities undertaken by the Bank or persons appointed by the Bank to address specific matters related to investigations/audits, such as evaluating the veracity of an allegation of possible Fraud and Corruption, through the appropriate mechanisms. Such activity includes but is not limited to: accessing and examining a firm's or individual's financial records and information, and making copies thereof as relevant; accessing and examining any other documents, data and information (whether in hard copy or electronic format) deemed relevant for the investigation/audit, and making copies thereof as relevant; interviewing staff and other relevant individuals; performing physical inspections and site visits; and obtaining third party verification of information.
